## DETAILED ACTION

1. Claim 1 is presented for examination.

References in applicant's IDS form 1449 have been considered.

### *Drawings*

2. Figure 1-3, 8-9, and 15-16 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC §102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by **Chu** U.S. Patent No. **5,530,645**.

Art Unit: 2155

5. As to claim 1, Chu teaches a method for compressing a first stream of data, said first stream of data comprising a plurality of input words, comprising:

receiving said plurality input words (see Fig. 4, step 130, col. 3, lines 23-30),  
adaptively compressing said plurality of input words into a plurality of compression codes (see Fig. 4, step 142, 144); and  
outputting said plurality of compression codes upon encountering an end-of-file signal in said first stream of data, wherein said plurality of compression codes are fewer than a number of said plurality of input words (see Fig. 4, step 220, 222, col. 3, lines 54-62).
